Summary

2x certified Software Engineer with 7+ years of experience designing, modernizing, and scaling enterprise applications using .Net Core, .Net Framework, C# and the .NET ecosystems. Strong expertise in Microsoft SQL Server, PostgreSQL, MySQL with proven ability to analyze and refactor legacy systems into modern, maintainable architectures.

Experienced in building enterprise solutions, developing high performance APIs, and handling large scale transactional systems in fintech environments. Skilled in system design, data migrations, and distributed architectures, with hands on experience in cloud platforms (AWS, Azure) and CI/CD pipelines.

Adept at debugging complex systems, improving code quality, and leveraging AI assisted development tools such as Github Copilot to accelerate delivery while maintaining engineering standards.

- **Backend:** .Net Core, .Net Framework, Asp.Net, REST APIs, Microservices, TDD (xUnit, nUnit), TopShelf, Worker Service.
- **Frontend:** ReactJS, Next.js, Angular, HTML, CSS, JavaScript
- **Cloud & DevOps:** AWS (Lambda, EC2, S3, RDS, SNS, Elastic Beanstalk), Azure (App Service, VMs, Blob Storage), Docker, CI/CD pipelines
- **Databases:** PostgreSQL, MongoDB, MySQL, MSSQL, Redis, Oracle
- **Messaging & Event Systems:** Kafka, RabbitMQ, Redis Pub/Sub
- **Project Management & Collaboration:** Jira, Trello, Azure Boards, Slack, Microsoft Teams

Experience

Backend Developer

FCMB Group

Mar 2024 – Feb 2026

- I worked in a team which managed these applications: Smecollect, Business Zone, Financial Authentication Service (FAS) etc
- Led the backend team that managed smecollect, a cash collection application where businesses can be onboarded and can receive payments for the service(s) they offer. The application handles incoming HTTP webhook requests through an idempotent API endpoint, ensuring that payment transactions are processed reliably with full ACID compliant database. The application was deployed using a Kubernetes cluster with 5 instances scaled out horizontally. This was built using .Net Core, Entity Framework, Topshelf, MSSQL, Restful APIs, GIT and brought in a total revenue of 15 billion naira to the bank in its first year.
- I was also in a team that managed the Business Zone (<https://businesszone.fcmb.com/>) platform. This platform is a comprehensive suite developed by First City Monument Bank (FCMB) to support both individual users and SME owners. It integrates various external services (e.g Zoom API, Azure CDN, Azure Blob Storage) aimed at enhancing business operations, providing educational content, and fostering professional development.
- Modeled and optimized SQL databases, including schema design, indexing strategies, and query tuning to improve performance under heavy load
- Implemented caching and rate-limiting strategies using Redis, improving system responsiveness and reducing database load
- Architected and maintained event-driven systems (Kafka, Redis Pub/Sub, RabbitMQ), implementing producer/consumer workflows, asynchronous processing etc
- Mentored junior developers in microservices architecture, REST API best practices, and database optimization on platforms like Codebar.io, Zoom meetings.
- Leveraged AI assisted development (Claude, ChatGPT) tools to accelerate implementation, debugging, and code quality improvements

Software Engineer

Smart Power Billing (Sterling Technologies)

Apr 2022 - Mar 2024

- Managed a small team that worked on these applications: QuikPay, Diaspora Billing, Quikcash, ERPs applications for organizations like BEDC, EEDC and Geometric (APLEs)
- Designed and built high-scale services supporting a distributed financial platform by incorporating idempotency, horizontal scaling patterns, and fault-tolerance. This service serves 15M+ users and brings 10+ billions in monthly transaction volume.

Full Stack Web Engineer

First Bank of Nigeria Ltd.

Feb 2021 - Feb 2022 (1 year 1 month)

- Led a two-person team to develop a service-based application automating interbank dispute resolution, resolving 90%+ of daily disputes using Asp .Net Framework, Microsoft SQL Server, Topshelf, Oracle, Entity Framework.
- Developed APIs using .Net Framework and ReactJS for frontend interfaces, improving system responsiveness and scalability.
- Managed deployment and server maintenance using automated scripts and CI/CD tool

Software Engineer

Jensiv Limited

Sep 2018 - Dec 2020 (2 years 4 months)

- Collaborated with a team of developers and operations to launch ScenicPlots, a mobile based app for storytellers to showcase stories to movie producers, agents, and streaming networks
- Using Xamarin(C#) at first then migrating to React Native, for Mobile, Python (Django) for the back-end , Git and MySQL, Deployed Containerized application to Heroku, supporting 1000+ published stories and 100+ registered writers in West Africa.

Education

Middlesex University

Bachelor of Science - BS, Computer Science

2015 - 2018

Licenses & Certifications

ADSE - APTECH Computer Education (2015)

AWS Certified Cloud Practitioner - AWS (2025)

AWS Certified Solutions Architect - AWS (2026)
